What is the weakest form of wind borne debris protection installed on the structure? First, use the table to 7. **Opening Protection:** determine the weakest form of protection for each category of opening. Second, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings and (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.
